

**Amendments to the Claims:**

1 – 34. (Canceled)

35. (Original) A method of coiling a medicament carrier, said carrier having the form of an elongate strip and having multiple distinct medicament doses carried thereby, the method comprising

- (a) receiving the leading end of the elongate medicament carrier by a spindle;
- (b) rotating said spindle whilst keeping the elongate medicament carrier generally static.

36. (Original) A method of coiling a medicament carrier, said carrier having the form of an elongate strip and having multiple distinct medicament doses carried thereby, the method comprising

- (a) receiving the leading end of the elongate medicament carrier by a spindle;
- (b) rotating said spindle whilst keeping moving the elongate medicament carrier in a lateral sense.

37. (Previously Presented) A method of coiling according to claim 35, wherein the spindle frictionally engages the elongate medicament carrier.

38. (Previously Presented) A method of coiling according to claim 35, wherein the end of the elongate medicament carrier is received within a slit provided to the spindle.

39. (Previously Amended) Coiled medicament carrier obtainable by a method according to claim 35.

40 – 42. (Canceled)
